

# The Basics of The Leadership Library® on the Internet

## The Leadership Library®

includes over 400,000 listings from over 40,000 government, legal, corporate, media, judicial, and nonprofit organizations - and the database is updated daily.

## Search by name, organization, or keyword

Use titles, areas of interest, educational background, geographic location, and other criteria to build the exact list you need.

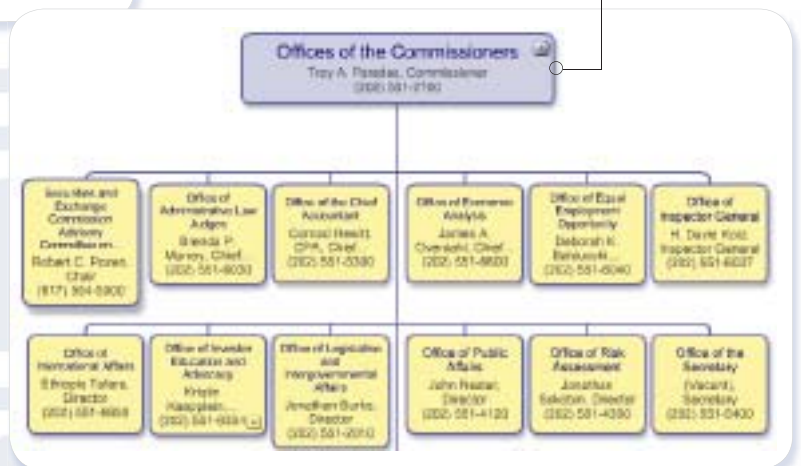

**Build A List** enables you to create custom contact lists using criteria such as job function, specialty, industry, location, and organization size. Format your list to include the data elements you want, such as name, title, address, e-mail, and bio. Save your query and your custom format, and export your list to Excel® or other file types.

**But wait, there's more!** Users can add notes and bookmarks to listings, and link to organizations' web sites or send e-mails directly from The Leadership Library®. Look for links at the top of listings, or ask us to point you in the right direction.

**Free User Support** Communicate directly with our technical support staff at [techsupport@leadershipdirectories.com](mailto:techsupport@leadershipdirectories.com). We also offer free phone training and webinars for new employees. Contact us to learn about new features and how to maximize the searching, exporting, and list-building capabilities of The Leadership Library®.

## Interactive Federal Org Charts

Click on the button next to any Federal employee or organization's listing and see where they fit in the hierarchy of Federal departments, plus see who reports to whom.
